Thursday 28 May 2026

1:30 PM - 6:00 PM

The Athenee Hotel, a Luxury Collection Hotel, Bangkok

Retail Track

Sustainable Retail Practices

Scope 3 Emissions Track

Supply Chain Emissions & EU Compliance

E-Mobility Track

Sustainable Transport & Good Mobility

Be part of the **9th edition** of the dynamic platform designed to inspire action, share best practices, and accelerate sustainable transformation across industries.

REGISTER HERE

OUR MISSIONS

To shed light on business practitioners who have created business value while improving their impact on people and the planet.

To connect with relevant potential sustainability partners and services

To get inspired by leading sustainable initiatives and projects in Asia.

To empower businesses with innovative and effective strategies driven by economic, environmental, and social performance.

TRACK 1: Retail

Sustainable retail practices aligned with Thai government initiatives

This track explores **how retailers can embed Extended Producer Responsibility (EPR) into their core business strategies**, aligning with evolving consumer expectations and emerging regulatory frameworks. It focuses on how retailers, together with producers and importers, take responsibility for the full lifecycle of products and packaging, including collection, recycling, and recovery systems. Discussions highlight how retailers can drive EPR implementation by influencing upstream suppliers, enabling take-back and reverse logistics, and engaging downstream consumers—reducing environmental impact while maintaining profitability and strengthening long-term brand value.

TRACK 2: Scope 3 Emissions

Supply Chain Emissions & EU Compliance

This track addresses the growing importance of managing Scope 3 emissions—indirect emissions across the entire value chain, which often make up the majority of a company’s carbon footprint. It covers **strategies for measuring, reporting, and reducing supply chain emissions**, as well as navigating **evolving regulatory requirements** such as EU sustainability and disclosure frameworks.

Emphasis is placed on supplier engagement, data transparency, and cross-value-chain collaboration to achieve net-zero targets.

TRACK 3: E-Mobility

Sustainable Transport & Good Mobility

This track focuses on the **transition to sustainable transport systems** through **electrification, smart mobility solutions, and low-carbon logistics**. It highlights innovations in electric vehicles, infrastructure, and urban mobility that reduce emissions and improve efficiency.

The sessions explore how businesses can adopt cleaner transportation models, optimize logistics, and contribute to more sustainable and livable cities.

Sustainability for Business Forum 2026 Program

1:00 PM - 1:30 PM	Registration
